Product Information: TUSK MAXI MODULAR BIKE PARK KITS

Planning Your Space: Bike Park, Back to Back, MAXI 3+3, 4+4 and 5+5

The simple rules for planning your space:

All TUSK Modular Bike Parks are delivered flat packed and require just a simple assembly. Refer to **Architects, Planners and Installers notes (sheet 18)** for complete assembly/installation instructions. The **Back to Back** kits, as in photo above, are designed to have each of the 4 floor rails securely anchored to the floor with the 2 x M8 Drill-Through bolts. All fixings supplied. If the Bike Park is being secured to a timber structure, then use M8 Coach Screws (not supplied).

Footprint: 1.07m x 'L' (metres)	
MAXI 3+3	0.85
MAXI 4+4	1.21
MAXI 5+5	1.57

When installing in a confined area, a few tips:-

1. Space must be left each end for handle-bars to clear. Allow 30cm (12") either end of **Bike Park**.
2. Allow for when the bikes are racked as they will protrude 1.85 metres from the centre of the assembly each side.
3. Clear, unobstructed walkway for access must be not less than 1 metre for minimum access.
4. All **MAXI Bike Parks** are based on 36cm centres
5. Tools required for assembly and installation:
Electric drill
Masonry drill 8mm diameter x 125mm long (min)
Hammer
M8 socket and M8 spanner
Safety eye protection (when drilling into masonry)
Tape measure

Space Required (not to scale)
